The Manager
Universal Service Fund
36 Trafalgar Road
4th Floor PCJ
Kingston 10

Dear Sir or Madam:

Please note that concerning the program Technology Enable Productivity we crave your indulgence as we attempt to work through other supporting documents.

We have engaged the National Water Commission on more than one occasion about the absence of a meter for premises occupied by the organization to become regularized. We are aware that they have visited several times and have failed to identify where a current meter exists and how to address same.

We also are not owners of said property and we are not interested in pursuing the ownership of the same on the basis that we believe that this property is owned by the commissioner of land and should remain in that state.

We ask that on those premises we are not disallowed from performing activities that improve the technological advancement of residents of our community.

Yours for development

David Allen

Chairman
